

TAC Security receives CREST Accreditation as Penetration Test Provider for Second Year in a Row

Mumbai; July 16, 2024: TAC Security, a global leader in cybersecurity solutions and listed as TAC InfoSec Limited (NSE Emerge: **INE0SOY01013**), is proud to announce that it has once again achieved CREST accreditation for its penetration testing services, marking the second consecutive year of this esteemed recognition. This accolade highlights TAC Security's steadfast dedication to upholding the highest standards in cybersecurity.

The CREST (Council of Registered Ethical Security Testers) accreditation is a globally esteemed certification that signifies excellence in the realm of penetration testing services. Unlike other certifications, CREST does not mandate a specific penetration testing methodology. Instead, it emphasizes the entire business process, including meticulous scoping and rigorous quality assurance controls for reporting. This comprehensive approach ensures that accredited organizations consistently adhere to industry best practices.

“Our sustained recognition by CREST underscores our unwavering commitment to providing top-tier cybersecurity services,” said **Trishneet Arora**, Founder and CEO of TAC InfoSec. “Earning this prestigious accreditation for the second year in a row is a powerful testament to our team's exceptional expertise, our innovative methodologies, and our dedication to maintaining the highest quality standards in all our processes and reports. At TAC Security, we are relentless in our pursuit of excellence, ensuring our clients receive the most advanced and reliable cybersecurity solutions available.”

The global penetration testing market is witnessing significant growth, driven by an increasing number of cyber threats and the widespread adoption of cybersecurity measures across various industries. Market research indicates that the penetration testing market size, valued at approximately USD 1.8 billion in 2022, is projected to reach USD 4.5 billion by 2028, growing at a compound annual growth rate (CAGR) of 16.2%. This growth is propelled by the escalating need for robust security solutions to safeguard sensitive data and ensure compliance with regulatory standards.

About TAC InfoSec Limited

TAC InfoSec Limited (branded as TAC Security) is a global leader in Vulnerability Management. It protects Fortune 500 companies, leading enterprises, and governments worldwide. TAC Security manages 5 million vulnerabilities through its Artificial Intelligence (AI)-based Vulnerability Management Platform, ESOF (Enterprise Security in One Framework).
