TAC Security Adds Leading AI Companies, Including Anthropic, Perplexity AI and others as Clients for ESOF AppSec

- **AI Is Reshaping Cybersecurity, But the World's Leading AI Companies Still Rely on TAC Security's ESOF AppSec for Independent Validation**
- Selection of TAC Security's ESOF AppSec by leading AI and technology companies reinforces the continued importance of independent application security assessment in the AI era

San Francisco & Mumbai, May 2026: TAC Security, a global cybersecurity company specializing in vulnerability management and application security, announced that it added leading AI and technology companies as clients in April, including **Anthropic, Perplexity AI, Replit, Odoo, and Litera**, for **ESOF AppSec Application Security Assessment**.

This development comes at a defining moment for the cybersecurity industry. Earlier this year, the launch of AI-powered security capabilities by frontier AI companies sparked widespread discussion across the cybersecurity market about how artificial intelligence could reshape traditional security testing, vulnerability discovery, and application security assessment.

TAC Security believes the market reality is becoming increasingly clear: **AI Is Reshaping Cybersecurity — But Leading AI Companies Still Rely on TAC Security's ESOF AppSec**

As AI companies build faster, more complex, and more business-critical software ecosystems, the need for trusted, third-party application security validation becomes even more important. The addition of leading AI and technology companies to TAC Security's ESOF AppSec client portfolio reflects this shift and reinforces the role of independent assessment in helping organizations validate trust, strengthen compliance, and secure applications at scale.

"AI Is Reshaping Cybersecurity — But Leading AI Companies Still Rely on TAC Security's ESOF AppSec. The addition of leading AI and technology companies, including Anthropic and Perplexity AI, to our ESOF AppSec client portfolio reinforces a powerful market reality: even the world's most advanced technology companies require independent, enterprise-grade application security assessment." — **Trishneet Arora, Founder and CEO, TAC Security**

TAC Security's **ESOF AppSec** helps organizations assess application security posture, identify vulnerabilities, support compliance requirements, and build trust with customers, partners, and regulators. As AI adoption accelerates globally, TAC Security continues to strengthen ESOF AppSec as a trusted platform for companies that cannot afford to compromise on application security assurance.

From global enterprises to frontier AI companies, TAC Security continues to support organizations building the future of secure software.

In March, TAC Security Surpasses 10,000 Clients, and Emerges Among the Top 5 Vulnerability Management Companies Globally.
